Work History

2021-06 - Current

Front End Developer

USABlueBook, Chicago, IL

· Developed user interface components using React.js to create visually appealing and responsive web applications for USABlueBook.

· Collaborated with cross-functional teams including designers and back-end developers to gather requirements and implement front-end solutions.
· Utilized React.js concepts, such as Redux and Flux, to build scalable and maintainable UI components.
· Optimized front-end performance by implementing efficient code, leveraging browser caching, and reducing load times.
· Conducted testing and debugging to ensure high-quality and bug-free user experiences across different devices and browsers.
· Worked closely with UI/UX designers to translate design concepts into interactive and user-friendly interfaces.
· Implemented responsive UI components and ensured cross-browser compatibility for seamless user experiences.
· Participated in code reviews to maintain code standards and identify areas for improvement.
· Collaborated with the development team to discuss UI ideas, review requirements, and troubleshoot issues.
· Documented changes, updates, and technical specifications to maintain a comprehensive codebase.
· Stayed updated on emerging trends, best practices, and advancements in React.js and front-end development.
· Demonstrated strong problem-solving skills, attention to detail, and a passion for delivering high-quality front-end solutions.

2020-02 - 2021-05   **Front End Developer**

ULTA, Chicago, IL

· Developed UI components using React.js to enhance the front-end performance of web applications at Ulta.
· Collaborated with the front-end development team to discuss UI ideas, review requirements, and troubleshoot issues.
· Implemented and maintained front-end architecture, ensuring scalability, responsiveness, and code quality.
· Translated user-friendly designs into seamless code, ensuring compatibility across different browsers.
· Optimized live platforms for speed and performance, adhering to best practices in React.js development.
· Documented codebase, including technical specifications and project documentation.
· Stayed updated on emerging trends and best practices in front-end development, particularly in the context of React.js.
· Worked closely with UX/UI designers to ensure seamless integration of design elements and optimize user experiences.
· Collaborated with back-end developers to integrate front-end and back-end functionalities, ensuring a cohesive and efficient application flow.
· Conducted thorough testing and debugging to ensure the quality and stability of web applications built with React.js.
